ABOUT THIS DOCUMENT

This document is the official reference for the *Mel* honey label and its seal strip. It records the design exactly as it is printed and applied, lists the information the label carries, sets out its technical specifications, and identifies its author and the rights that protect it.

It is intended for buyers, retailers, inspectors, printers, and anyone who wants to check the label's details or where it comes from.

AT A GLANCE

Label design	Ruben Alves
Producer	Alexandre Dias Alves
Origin	Santo André das Tojeiras, Castelo Branco
Original design date	5 August 2026

01 — THE PRODUCT

From a small village, not a factory.

This honey is harvested and extracted at Quinta das Caliças, in the parish of Santo André das Tojeiras, in the municipality of Castelo Branco, in Portugal's Beira Interior. The parish is known locally for producing good honey.

Production is small-scale and family-run. The bees are kept and the honey is harvested by Alexandre Dias Alves, with the help of his sons. Beekeeping runs in the family: Alexandre's father also kept bees, though never on a scale large enough to sell.

The bees forage freely in the surrounding countryside. The honey's floral composition has not been laboratory-tested, so no single-flower origin is claimed.

Product	Honey (*Mel*)
Net quantity	1 kg
Country of origin	Portugal
Harvest site	Quinta das Caliças, Santo André das Tojeiras
Producer	Alexandre Dias Alves
Beekeeper no.	380222
Sold at	Local markets

One continuous band, one central panel.

Wraparound label, flat. Artwork file: Ativo_8.pdf. Shown slightly larger than actual size.

LEFT BAND

Producer identity and traceability: name, address, lot, beekeeper registration and best-before date.

CENTRAL HEXAGON

The principal field of view: the product name *Mel* and the net quantity, framed in Hive Brown.

RIGHT BAND

The origin statement, set in the same script as the net quantity to tie the two ends together.

Every element, and why it is there.

1. **Producer name & address**
   Identifies the food business operator responsible for the honey.
2. **Lot number**
   Links each jar to a specific harvest batch for traceability.
3. **Beekeeper registration no.**
   The official registration number of the producer's apiary.
4. **Best-before date**
   "Consumir de preferência antes do fim de 2029."
5. **Product name**
   Mel, the legal name of the food, at the visual centre.
6. **Portuguese flag mark**
   A hand-painted flag accent signalling Portuguese origin.
7. **Net quantity**
   1 kg, in the same field of view as the product name.
8. **Origin statement**
   "Mel de origem Portuguesa."
9. **Decorative imagery**
   Honey drip, honeycomb and daisies inside the hexagon.
10. **Die-cut contour**
    Rounded band with a raised hexagon, outlined in dark ink.

A seal that shows the jar is untouched.

Actual size

Applied (3D render)

The seal strip is a narrow sticker with a circular head. The disc sits on top of the lid; the strip runs over the lid's edge and down the shoulder of the jar to meet the top point of the hexagon panel.

Once applied, the jar cannot be opened without breaking or lifting the strip. Buyers get a simple, visible sign that the jar has not been opened since it was filled.

Circular head

Ø 20 mm disc with a Seal Gold centre dot.

Stitched line

A dashed Seal Gold line evoking hand stitching.

Two-tone body

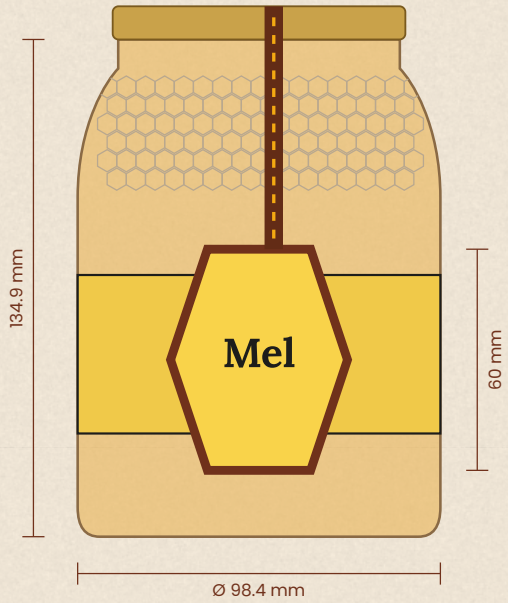

Hive Brown edge and Comb Brown core, matching the hexagon frame.

Artwork file: Selo_V7_2026_Final.pdf

Made for the classic 1 kg honey jar.

FRONT VIEW

TOP VIEW

The label covers about three quarters of the jar's circumference (≈ 309 mm), leaving a clear window of about 79 mm at the back through which the honey can be seen.

Jar	Favo honey glass jar, embossed honeycomb shoulder
Capacity	746 ml · holds 1 kg of honey
Diameter	98.4 mm
Height	134.9 mm (without lid)
Glass	Clear (flint)
Closure	Twist-Off 77 mm, gold metal lid

Jar dimensions from the supplier's published specifications.

APPLICATION

1. Fill and close the jar. Make sure the glass is clean, dry and at room temperature.
2. Apply the label to the smooth lower body, below the honeycomb embossing, with the hexagon centred on the front and the band level.
3. Apply the seal strip: disc on the lid, strip down over the lid edge and shoulder, ending at the top point of the hexagon.

09 — AUTHORSHIP & COPYRIGHT

Who made this design, and how it may be used.

© 2026 Ruben Alves. All rights reserved.

Author	Ruben Alves, designer of the label and the seal strip
Original creation	5 August 2026
Final artwork	Seal strip 13 August 2026 · Label 3 September 2026
Authorised use	Used with the author's permission, exclusively on honey produced by Alexandre Dias Alves

DO NOT COPY

Without the author's prior written permission, no one may:

- reproduce or print the label or the seal strip, in whole or in part;
- adapt or modify the design, or create derivative versions of it;
- use the design, or one confusingly similar to it, on any other product;
- distribute, publish or sell the artwork files.

YOU MAY

- view and share this document, unaltered, for reference;
- photograph the product for reviews, press or personal use.

Permission requests must be made in writing to the author.

Authorship record

The fingerprints below are SHA-256 codes calculated from the exact contents of the original files. Any change to a file, however small, produces a completely different code, so these values identify the original artwork as it existed when this document was issued.

FILE	CONTENT	SHA-256 FINGERPRINT

WHAT IS PROTECTED

The overall visual design: its composition, layout and arrangement of elements, the hexagon-and-band contour, the colour treatment, and the seal strip design.

WHAT IS NOT

The word “Mel”, the factual mandatory information, and common motifs as general ideas (hexagons, honeycomb, honey drips). Protection covers their specific expression in this design.

© 2026 RUBEN ALVES · DO NOT COPY

The rights that protect this design.

COPYRIGHT

Under the Portuguese Code of Copyright and Related Rights (CDADC), an original work is protected from the moment it is created, with no registration required. This includes works of applied art and design. Protection lasts for the author's lifetime plus 70 years.

UNREGISTERED EU DESIGN

A new design with individual character is automatically protected against copying across the European Union for three years from its first public disclosure in the EU.

INTERNATIONAL

Through the Berne Convention, copyright in the work is recognised in its member countries without formalities.

This section is general information, not legal advice. For specific questions, consult a lawyer or an industrial property attorney.

OPTIONAL WAYS TO REINFORCE PROTECTION

IGAC REGISTRATION

Registration of the work with the Inspeção-Geral das Atividades Culturais is optional. It serves as conservation and public proof of authorship, and its certificate has legal value.

INPI DESIGN REGISTRATION

A national design ("desenho ou modelo") registered with the Instituto Nacional da Propriedade Industrial gives an exclusive right in Portugal, renewable up to 25 years.

EUIPO REGISTERED DESIGN

A registered EU design covers all member states for five years, renewable in five-year periods up to 25 years.

Design registration requires the design to be new. In the EU, a designer's own disclosure does not destroy novelty if the application is filed within 12 months.
